ILEARN Individual Student Reports (ISRs): Interpreting Preliminary Data

Schools accessing Spring 2021 ILEARN ISRs from the Online Reporting System (ORS) may see ISRs reflecting either a N/A or an overall scale score but no reporting category data. In instances where the student completed both components of the assessment (CAT/Fixed Form and Performance Task), the ISR will display this way until handscoring has been completed on both tests. Once handscoring is completed, the ISR will populate with an overall scale score and reporting category data.

Schools should review their student score reports and ensure that they see an overall scale score and a reporting category score prior to dissemination to parents or guardians. In rare instances where a student only took the CAT/Fixed Form component of the test, it is expected that an overall score appears without reporting category data. Please contact the [Indiana Assessment Help Desk](#) for questions or assistance.
